I am very concerned over the proposed NAB's petition 04-160. I am a PAYING customer of satellite radio and I love the variety and timeliness of the music and information that I receive from using the service. I feel that I would be greatly cheated if the NAB's petition passed. Satellite radio is a wonderful service that is innovative and fresh. Please help Satellite radio make a change in a dry industry and do not support the NAB's petition...
